

# Vikash Kumar

Flutter Developer

## 3+

Years of Experience

## Summary

As a passionate Flutter Developer, I am eager to contribute my skills in building beautiful and efficient mobile applications. With a strong foundation in Dart and a keen eye for design, I am committed to delivering high-quality results and continuous learning.

## Projects

### Abybaby E-com PVT LTD

#### Node API

- Developed backend APIs to capture salesman activities including daily follow-up, recall, and work updates.
- Implemented secure authentication, role-based access, and fast data processing for real-time activity reporting.

#### KrishiVikas

- Built a buyer-seller agriculture marketplace with 8 major categories, including Rent, Used, and New product listings.
- Added chat, cart, wishlist, and order features, integrating secure backend APIs using Provider with optimized UI/UX.

App Link: [Android](#) | [iOS](#)

### Abybaby Attendance Management System

- Developed a complete employee attendance app with check-in/out, GPS tracking, leave requests, and work logs.
- Implemented real-time location validation, secure API integration, and a responsive UI using GetX.

### Edugaon PVT LTD

### DigiPrivilege – Hotel Booking System

- Developed a hotel booking platform with room listings, availability checks, secure reservation flow, check-in/out, pricing rules, discounts, and booking history.
- Integrated backend APIs with an optimized, fast, and smooth UI/UX for reliable hotel management.
